

# UID ~ Stock Management

---

---

**UID~ Stock Management manages your inventory control from receipt of goods through to dispatch. Allowing the user to complete routine physical inventories, manage a perpetual inventory and track items loaned to / checked out by employees or customers.**

Get in control of your Inventory and Stock Control with UID Stock Management – the complete inventory tracking solution for small business. Increase the value of your business, satisfy your customers and create more freedom in your life with UID Stock Management software.

## **Benefits**

- Avoid the financial impact of an inventory / stock write off.
- Always deliver product when you promise – no need to let your customer down due to insufficient stock.
- Save time – Easily locate all of your stock.
- Fulfill more orders, more efficiently.
- Easily trace loaned items and raise invoices if applicable ensuring better traceability.

Inventory related problems can be frustrating, financially stressful and have a direct impact on your business's ability to succeed. Now, UID Stock Management software provides all the capability you need to track your inventory without the complexity or expense of an MRP system.

From individual contractors to larger operations with multiple locations, UID Stock Management software will help your business succeed.

UID Stock Management is ideal for warehouse / storage depots, light manufacturing operations, distribution centres, retailers and office stock rooms & supply closets.

## **Features**

- Quick and easy to setup, providing barcode data entry for increased accuracy and speed.
- User customisable fields.
- Loans Management capability.
- Ability to produce many different user reports.
- Integrates to mobile barcode data collection devices.
