

MISSION CRITICAL LABELS

THIS DOCUMENT IS FOR CUSTOMERS EYES ONLY

G-Smart Technology is the only way that you can guarantee the durability and longevity of your TT printed labels.....

When the information you are printing is legally required or critical to the product can you afford to have your labels fail in the field.....

A fail safe system that eradicates operator errors.....

Non technical operating software that can be used by anyone.....

Cost effect preventive action means no costly corrective action.....

Using patent pending RFID technology G-Smart Technology is a unique system that can only be provided by UID UK. The technology can be applied to new TT printer purchases or as a retro fit to your existing TT printers.....

For more information on how this brand new technology works call us on +44 (0)1845 570700
